PROJECTS - LIVE

Lamienins
https://apps.apple.com/us/app/lamienins/id1488584109

- Lamienins is a social marketplace, but it's also an influencer marketing platform. Its goal is to give users a platform where they can find literally everything like product, food,merchandise.

eCardMe
https://apps.apple.com/us/app/ecardme/id1500564821

- eCardMe is an online card sharing application that caters to the people who like to share their details and achievement profile with others

OWScanner
https://apps.apple.com/ro/app/owscanner/id1469034744

- OWScanner is a QR Code scanner, it scan codes from any camera efficiently. It can scan vCard, Text and URL data and so on. If the scanned data is any text, the user can share the text via external app or can save the file as a pdf.

mySPIO
https://apps.apple.com/in/app/myspio/id874329773

- Basically it's a coupon app to buy any products on Spio market.

Aswagna
https://apps.apple.com/in/app/aswagna/id1518027464

- Aswagna is an app where you can order from different sellers in 1 easy checkout, saving your time and efforts.

Drivergroup
https://apps.apple.com/in/app/drivergroup/id1518031289

- This app will be used by the drivers to deliver items to the customers of Aswagna

PROJECTS - NOT LIVE OR UNDER-BUILDING

D2D
Shopping App

- It is a complete shopping app where users can buy grocery, fish type products from their local area. User can track their order in live mode also.

Zomato Clone
Food Delivery app

- We made a zomato clone app as organization said. It's pretty similar UI as zomato's order food delivery section.

Quiz365
Entertainment and Trivia app

- It's a fun game playing app with some categorize question's quiz. User can play the quiz with real money and earn double benefit if he/she wins the game.

ScanPocket App
Scaning and Payment App

- It is a scan and pays app with a currency converter too. Implemented till currency conversion rate but real currency conversation is in undergoing.

Frust App (Android with Kotlin)
Anonymous chat app

- It is an anonymous chat app in Android with Kotlin language with a firebase. Group chat section has also been implemented.
